	KINGDOM OF SAUDI ARABIA 4.5 kg			Document	17b
Season	2026	Compiled by	Colette le Roux	Date	22/12/2025
Commodity	Table Grapes	Approved by	Juan Van Zyl	Version	1.0

Please consult the Saudi Arabia working document on d6 regarding the sampling procedures.

Phytosanitary requirements	• No pre-season registration (pre-clearance) for growers on eCert/PhytClean is required. This market is open to all PUCs, PHCs, fruit types and varieties. The Saudi importer, however, is required to register the detail of the produce they import with the Saudi authorities. • Production areas within the Bactrocera dorsalis monitoring and infected areas, are required to apply for a Removal Permit from DOA on PhytClean/eCert, 30 days prior to planned transfer dates to non-infected areas (ie. port). This removal permit must accompany every load transferred to non-affected areas. • No Accompanying documents are required.
Phytosanitary rejection criteria	• Rejection by Dole, PPECB or DOA for any fruit fly specie will result in pallets returned as BTG (Back to Grower). Rejected pallets may NOT be repacked or re-labelled and re-presented for PPECB or DOA inspection.
Residue requirements & restrictions	• The Technical Regulations (SFDA. FD 382 - The Maximum Limits of Pesticide Residues in Agricultural & Foodstuffs"), (SFDA.FD 193 "General Specification for Contaminants and Toxins in Foodstuffs") and (The Microbiological standards for commodities & Foodstuffs - GSO 1016) require **mandatory residue, microbiological & heavy metal anaylsis** and compliance to set maximum levels. • **Only PPECB may collect the heavy metal & microbiological samples** for analysis, even if the pack house has Private Sampling accreditation from PPECB. For **residue analysis**, it is **acceptable to do own sample**, providing a full analysis is done. • To facilitate the PPECB sampling, the **Q251** (currently rev. 2) **form** must be completed before packing and sent to the regional PPECB office for action. The form is available on d6. • Sampling is done **per PUC and fruit type (eg. grapes); not per variety**. Only one sample is taken for these 2 analysis types, from the packing line, to enable linking to the consignment note. **Residue analysis:** - done on PUC level. - valid for 3 weeks. - dithiocarbamate analysis done every 12 weeks. **Heavy metal & micro analysis:** - (one) sample must be taken by PPECB; apply for sampling on Q251 form. - done on PHC level. - valid for 12 weeks. - it is advised to send the Q56 form of the sampling done to Dole FSQA for tracking purposes.
Varieties	• As per Dole Packing Instruction. • **White, Red & Black seedless, and Redglobe.**
Berry Size (mm)	As per Dole instruction and Dole Maturity Specification sheet.
Sugar levels (Brix)	As per Dole Grading Specification sheet for the variety.
Food Safety requirements	• **Residue COA** available and approved by Dole prior to packing. • Complete **spray application records** for the batch. • Valid **GlobalGAP IFA V6.0 GFS** certificate. • Additional requirements may be noted on the weekly packing instruction.

This document is for the use of nominated recipient and may not be copied, used or distributed without Dole's consent. Printed copies are uncontrolled always refer to d6 for the current version.
